

Do you need a Wi-Fi connection to access and return your iLearn lessons? If so, stop by one of our school campuses to connect with the district network. Pulaski County Schools has made our network available to students and staff without having to enter a building. From many of our parking lots, you can connect your personal devices to our network. How do you do this? Connect to PC Public, launch a browser and then enter your school short username (i.e. 22nicter) and password. Be sure to complete all information on the set-up screen including checking the checkbox for AUP compliance. If you have difficulties and need assistance, contact a district technician at 606-679-1123.

In order to help our families identify where Wi-Fi access is available, below you will find aerial photographs of several of our school campuses. The Wi-Fi areas are highlighted in yellow in the photographs. Any student in our district can access Wi-Fi from any of the following locations: Burnside Elementary, Central Office, Eubank Elementary, Nancy Elementary, Northern Elementary, Pulaski County High, Shopville Elementary, Southern Middle, Southwestern High.

Southern Middle

Northern Elementary
